

# ARNO Whitepaper

## 1. Introduction

ARNO is not another meme coin chasing hype - it's a cultural movement born from digital chaos.

In a sea of recycled dog tokens and half-baked promises, ARNO stands as a rebellion against the traditional crypto narrative.

Built for the meme generation and powered by real vision, ARNO blends humor, utility, and decentralization.

We're not just here to compete - we're here to rewrite the game.

## 2. The Problem

The crypto space is flooded with lifeless meme tokens - all bark, no bite. They launch, trend, and vanish with zero innovation.

Investors are burned out. Communities are fragmented. Meme culture is being sold out for cheap engagement.

## 3. The ARNO Solution

- Ruthless meme energy, not dog coin cliches
- Community-first governance (DAO roadmap)
- A real platform: launching on Solana, warheading to BSC
- Native exchange with ARNO/USDT as the default pair

## 4. Tokenomics

Total Supply: 100,000,000 ARNO

Distribution:

- 40% - Community / Airdrop
- 20% - Liquidity
- 15% - Marketing
- 15% - Development
- 10% - Team (Locked for 12 months)
